FOR IMMEDIATE RELEASE
October 7, 2009

Radiology Ltd. is involved in October - Breast Cancer Awareness Month: Community Involvement/Sponsorship, Breast Imaging and Interventional Radiologists Available for Interviews/Demonstrations

TUCSON, AZ – Radiology Ltd. is proud to be making a difference in our southern Arizona community – at the company level via a sponsorship and a golf tournament, and at the grassroots, employee level. Radiology Ltd. would be happy to make one of our Radiologists, specialists in their area of expertise such as breast imaging and intervention, available for interviews and demonstrations of our women's services imaging, in connection with your stories about breast cancer awareness month – this month, October. These Radiologists are specialists in the diagnosis and treatment of breast disease, including, and most prevalently, breast cancer. They provide expert interpretation in mammography, as well as ultrasound and MRI of the breast. Many also have extensive experience in image-guided biopsy procedures.

Also in connection with Breast Cancer Awareness Month, Radiology Ltd. is once again, a Local Flagship Sponsor of [Making Strides Against Breast Cancer](#) (MSABC) fundraising walk benefitting the American Cancer Society. This year marks the 7th annual MSABC fundraising walk, which will be held Sunday, October 25, 2009. And – a Radiology Ltd. organized golf tournament is being held October 31st, at Loew's Ventana Canyon Resort, with proceeds benefitting the American Cancer Society MSABC.

At the employee level - throughout September and October, Radiology Ltd.'s approximate 400 employees at all nine of our Tucson area locations, are holding internal American Cancer Society fundraising events – everything from traditional bake sales, multiple crockpots of chili for \$5.00 a bowl in the Wilmot Center for Women's Imaging to a roller skating party – where many employees (men included!) donned pink clothes and dresses. Many participating restaurants have also donated 10% of Radiology Ltd. employee lunch totals to the American Cancer Society. So far, a total of \$3,808.64 has been raised through these Radiology Ltd. employee-driven internal fundraising events – and handed over to the American Cancer Society. Radiology Ltd.'s goal for 2009 is to raise \$12,000 for the American Cancer Society.

Radiology Ltd.'s Wilmot Center for Women's Imaging is the largest and most complete in southern Arizona for women's imaging, specializing in the following services: Breast MRI , Breast MRI Biopsy, Breast Ultrasound, Digital Mammography, Osteoporosis Screening "DEXA", Stereotactic Breast Biopsy, Ultrasound-Guided Breast Biopsy, and Uterine Fibroid MRI (prior to Uterine Fibroid Embolization). On the northwest side of Tucson, Radiology Ltd.'s La Cholla Center for Women's Imaging and Radiology Ltd.'s Rancho Vistoso Diagnostic Imaging Center also both offer many of the same women's imaging services.

Radiology Ltd. is entirely digital (this means better image quality and a faster turn around of results), and one of the largest physician-owned group practices in Tucson. We have been providing diagnostic imaging services for more than 70 years. There are more than forty-five radiologists (doctors who specialize in radiology) and more than 400 employees at our nine Tucson locations. Each of our radiologists is a specialist in their area of expertise. Radiology Ltd. offers Digital Mammography, CT Scans, MRI Scans, PET Scans, Ultrasound, Digital Radiography, Osteoporosis Scans (DEXA), and Interventional Radiology Services.
